

MT 1800 – Calculus I
Mathematica Preview

Name _____

5 points

Purpose: To give you a first look at the mathematics software *Mathematica*.

Procedure: Watch the 20 minute video at <http://www.wolfram.com/broadcast/screencasts/handsonstart/>
This video will give you a very basic introduction to *Mathematica* and show you some of the things that can be done with it. As you watch the video, answer the questions below.

Note: This assignment is due at the beginning of class on _____.
You are expected to complete this worksheet before class, so it will not be accepted late.

1. When do we use SHIFT ENTER?
2. *Mathematica* functions always start with a _____
3. When using a *Mathematica* function, the expression inside is always surrounded by _____
4. How do we convert a cell into text?
5. How do we open a new cell?
